

Water Quality Expertise on the CALFED Water Quality Parameter Assessment Team (PAT)

Background

The goal of the CALFED Water Quality Program is to provide good water quality for all beneficial uses: agricultural, drinking water, industrial, environmental, and recreational. The CALFED Water Quality Program relies on input from more than 200 stakeholders, known as the Water Quality Technical Group, representing these beneficial uses.

The Parameter Assessment Team (PAT) is an advisory body to the Water Quality Technical Group. The PAT is composed of technical experts who volunteer their time and expertise to evaluate water quality information and develop recommendations to the Water Quality Technical Group. In order to ensure that the PAT represents all beneficial uses to the Water Quality Program, the current PAT membership is being evaluated. The PAT members listed below in each beneficial use category listing were contacted to confirm their approval of the beneficial use category(ies) under which they are listed. Please note that some PAT members are listed under more than one beneficial use category.¹

Beneficial Use Category Listing

Agricultural Water Quality Expertise (8)

Robin Reynolds (California Dept. of Food and Agriculture)
J.P. Cativiela (California Rice Industry Association)
Fawzi Karajeh (California Dept. of Water Resources)
Stephen Murrill (S. D. Murrill & Co.)
G. Fred Lee (G. Fred Lee & Associates)
Markus Meier (Zeneca Ag Products)
Ted Roefs (U.S. Bureau of Reclamation)
Pat Dunn (Department of Pesticide Regulation)

Drinking Water Quality Expertise (8)

Elaine Archibald (Archibald & Wallberg Consultants)
KT Shum (Contra Costa Water District)
Lynda Smith (Metropolitan Water District of Southern California)
Bill Crooks (City of Sacramento)
Robin Reynolds (California Department of Food and Agriculture)
G. Fred Lee (G. Fred Lee & Associates)
Ted Roefs (U.S. Bureau of Reclamation)
J.P. Cativiela (California Rice Industry Association)

¹ Note: Brian Finlayson, Department of Fish and Game, is not listed under any of the beneficial use categories per his request.

Industrial Water Quality Expertise (2)

G. Fred Lee (G. Fred Lee & Associates)

Ted Roefs (U.S. Bureau of Reclamation)

Scott Folwarkow, Western States Petroleum Association

Environmental Water Quality Expertise (7)

Chris Foe (Central Valley Regional Water Quality Control Board)

Tom Grovhoug (Sacramento River Watershed Program)

Inge Werner (Sierra Club)

G. Fred Lee (G. Fred Lee & Associates)

Elaine Archibald (Archibald & Wallberg Consultants)

J.P. Cativiela (California Rice Industry Association)

Pat Dunn (Department of Pesticide Regulation)

Recreational Water Quality Expertise (0)

Joan Patton, San Francisco Estuary Project

Pete Soderberg, Dangermond and Associates

Human Health (0)

Alexis Milea, Department of Health Services
